

LIVESTOCK LOST DURING THE STORMS

NARROW ESCAPES ALSO REPORTED BY PEOPLE FROM LIGHTNING AT DIFFERENT PLACES.

(From Saturday's Daily.)
During Thursday's storm in Skull valley, lightning killed a fine work horse of Fred LaJennette. The animal which was in the pasture of Fred DeArmond at the time was valued at over \$100. A short time afterward a bolt hit a calf in the pasture of Joe Rudy and was instantly killed.
From the Date Creek country it was learned that a party in team coming from Peoria, Maricopa county, lost their pet dog that was running after a coyote, and the terrific outburst also affected for a few minutes all of the travelers who were about 100 yards distant from the place where the lightning entered the ground. Hundreds of trees in the vicinity of Prescott to the west have been stripped and such a demonstration of lightning has not been known in over a quarter of a century.
From the Grand Canyon country it was reported a few days ago that a son of Mr. and Mrs. W. W. Bass came in short range of a bolt while riding the range and was knocked from the saddle, being rendered unconscious for several hours.

8 NEW CITIZENS ARE GRANTED LAST PAPERS

(From Saturday's Daily.)
Eight new citizens, four Republicans and four Democrats, were given their final papers after examination here in the Superior court yesterday. The new voters are: Anton Ozanich, Vincent Tonnek, John George Mensome, Giovanni Bernardi, William George James, George Grenko, James Sullivan and Michael Holland.
Papers were refused Philip Blazini and John Chasnil of Jerome as their witness, Peter Gordon, who was to testify to their citizenship, couldn't prove his own citizenship. According to Gordon, he was naturalized in New Haven, Conn., in 1894, but his papers were burned up in the San Francisco fire.
The fact that Gordon could not prove his citizenship led Blazini, Chasnil and Gordon to apply for papers again. John Joseph Connel, of Jerome, also applied for papers yesterday.
Hearing on Peter Schafer's petition for citizenship was continued until next February as Schafer is confined to the Humboldt hospital and could not appear.
In addressing the prospective citizens before the examination, Frederick Jones, the examiner for Southern California and Arizona, said:
"Citizenship is a privilege, not a right. The great point is that all applicants should come before the courts with no reservation in their minds as to their oath of allegiance.
"Every American citizen, native or naturalized, must be loyal to this government whether he likes it or not, over and above anything that may come up, whether it may be with your native land or not.
"If any applicant present cannot give his entire loyalty to this government, now is the time for him to withdraw his application."
Examiner Jones asked rigid questions of the applicants regarding polygamy and anarchy. When James Sullivan was asked why he wished to become a citizen, he aptly replied: "Because my home is here and I want to have a voice in the conduct of this government."
After Judge Smith explained the duties and responsibilities of a citizen, J. H. Robinson, registration officer, finished the day's work by making the eight new citizens voters.

MINER'S CLOSE CALL FROM BEING KILLED
(From Sunday's Daily.)
Reports reached Prescott yesterday to the effect that two burros owned by an Italian prospector named A. Berretti were killed by lightning on Friday forenoon in the vicinity of the Bodie mining camp. Berretti at the time was bringing the animals to his camp, and first reports circulated were that he also had been killed. He was badly shaken up and unconscious for over half an hour. He stated afterward that a tree came within range of the bolt, otherwise he believes his death would have followed. He was distant from his burros about 200 feet at the time.

YAVAPAI'S FAME IS BECOMING GENERAL

(From Friday's Daily.)
That Yavapai county is gaining general fame for its healthful climate and scenic beauty was noted by the communications read at last night's weekly meeting of the Yavapai County Chamber of Commerce.
Forest Supervisor Hinderer turned over a communication to the body urging them to bring pressure to bear on the department of the interior to secure funds for new ladders for Montezuma's Castle in the Verde valley and the repair of the entrance to the castle. Secretary Sparkes was instructed to communicate with the secretary of the interior regarding the matter.
Three new residents of Prescott have been brought here through the efforts of the Chamber during the past week according to Secretary Sparkes. One of these newcomers will engage in the dairy business.
P. J. Farley, clerk of the Superior court, who recently returned from an extended Eastern trip, reported that he had distributed a great amount of Prescott literature in New York and other Eastern cities. It was his belief, according to his communication, that the population of Prescott could be doubled in a few years if the people of Prescott who make periodic trips to the East would distribute some of the Chamber of Commerce literature.

Another communication relating to the beauty of this section of the country contained a request from a representative of the Central News Photo Service Company of New York City for views from Yavapai county.
It was announced by Secretary Sparkes that the Chautauqua for 1917 had been authorized, as a guarantee fund of \$2,555 had been subscribed. Miss Sparkes was granted two or more weeks vacation from her duties as secretary of the organization.
The Chamber session adjourned, followed by a meeting of the Northern Arizona Fair Association.

BRIGHT ANGEL TRAIL AGAIN IN COURT

(From Saturday's Daily.)
The Bright Angel trail into the Grand Canyon loomed up once more in the Federal court yesterday when further evidence was presented by the United States attorneys in prosecuting the case of the United States vs. Ralph H. Cameron, et al., for conducting a curio store on the Cape Horn mining claim at the top of the trail.
The proclamation of withdrawal of the property, the refusal of patent on the claim, and a plat of the mining claims in that section were all admitted as evidence for the prosecution.
The forest ranger was examined yesterday as to the business of the curio store, its location, and the extent of the forestry service in the canyon.
The court took the matter of decision under advisement and allowed the defendant until August 25 to file a brief of its evidence and gave the prosecution until September 5 to file a reply brief.
The matter of a writ of habeas corpus for Jue Ming Wong was argued by Attorney Robt. E. Morrison for the defense and Deputy United States Attorney S. L. Pattee after which it was submitted for decision. Judge Sawtelle took the matter under advisement.
John Valenti, convicted of violating the interstate shipment liquor law, will be sentenced Monday. It is very probable that Judge Sawtelle will order the court adjourned Monday until the next term of court which starts the first Monday in September.

ANOTHER PIONEER IS CALLED OVER RANGE

(From Saturday's Daily.)
John D. Kinnear, an early-day miner of Tombstone, ended an eventful life yesterday at the Pioneers' Home in this city, his death taking place from a general breaking down of health. The deceased had reached the ripe age of 78 years, and was a native of Ohio. He came to Arizona in the early 70s and later located in Cochise county where he followed mining. His life was attended with privations in meeting conditions incidental to the pioneer, and his experiences were thrilling during Indian days. His faithful and devoted wife was at his side when the summons came. Kinnear had all the characteristics of early-day residents—genial manners and always ready to assist others with a generous hand.

GREEN MONSTER IS MAKING PROGRESS

MANAGER HUMBERT IS PLEASED WITH PRESENT OUTLOOK; MACHINERY ON WAY.

Special Correspondence.
JEROME, August 4.—Progress is steady at the Green Monster, where the men are seriously engaged in going after the underground ore bodies supposed to underlie certain locations on the property which point to something worth while deeper down. Manager Humbert says there is no complaint to be made concerning indications so far encountered, though ore bodies of real commercial size and importance have still to be found.
The management is about to install a blower to take care of the smoke in a long tunnel which they are prospecting. The old working in the Cliff claim is being utilized in such a way as to give natural ventilation. Clear headings have been secured at this point of operation.
A carload of iron pipe is on the ground for the water system which is to be constructed, and the new road is half completed. The contractor, B. S. Snyder assures the management the road will be completed within ten days. The new compressor and motors ordered for the mine have been shipped and if there is no delay in shipment of transformers, installation of the mine equipment should be made during the month.

W. A. Drake and LeRoy Anderson, of Prescott, and S. Dreben, of El Paso arrived last night to attend the directors' meeting held in the company's office in Jerome.

ANOTHER MINING COMPANY IN VERDE FIELD
Special Correspondence.
JEROME, August 5.—For the purpose of holding and developing about 100 claims located north of Jerome, the Jerome-Superior Copper Company has been organized by Jerome and Clarkdale men. The location of about 90 of these claims was accomplished in one day about two months ago. Since that time some assessment work has been done at a number of different points, scattered over the holdings. The officials and directors of the new company are with few exceptions men connected with the United Verde Copper Company. They have had a number of years' experience in the district.
The president of the Jerome-Superior is J. J. Stanton, vice-president, O. M. Wold; secretary, Frederick Thing; treasurer, Thomas Taylor. These men with Matt Bohn form the directorate of the company.
O. M. Wold, who recently resigned from the employ of the United Verde Copper Co., is away on a trip into Michigan and other sections of the country in the interest of the new organization. It has not been decided as to what method will be used for financing development work.

LEGISLATORS ARE POORLY PAID, SAY RETIRING MEMBERS

(From Sunday's Daily.)
From statements of members of the last State legislature it is evident that there are quite a number who do not wish to be returned and therefore are not entering the race at the primaries. It seems to be the common wail that \$7 a day is not enough pay for law-making. Some who served the 123 days of last session had to borrow money to return home on. Others had only a new suit and a few dollars to show for their time, while the majority just broke even.
Where the legislators' pay goes to is not known, but it goes some way according to those who are experienced. There are no cabarets in Phoenix and very few high priced amusements. The hotels give the law-makers special rates and meals are cheap. Notwithstanding all of these facts, the legislative member usually returns to his home poorer than when he left.
DISTINGUISHED VISITOR
(From Sunday's Daily.)
Dane Coolidge, of Berkeley, Cal., who is visiting Prescott for a month, enjoys prominence in the literary world, writing many books which have attracted wide attention. He has covered many topics, and his particularly pleasing work on cowboy life has given him fame. Mr. Coolidge is to devote his time while in this section to mines and mining, and in his observations will visit all districts. He is accompanied by Mrs. Coolidge.

FAIRVIEW GROUP IS ATTRACTING INTEREST

DEVELOPMENT GIVES HIGH GRADE VALUES; MINING INVESTORS ARE VERY MUCH PLEASED.

(From Sunday's Daily.)
Montana mining investors who have returned from the Fairview mines near Crown King, after making an extensive inspection of all openings, and particularly that point where a new shaft was started at the mouth of the tunnel, express themselves as very much pleased with the results determined by assays, that show gold values of \$83.51 and silver of \$7.08 to the ton, at a depth of only six feet.
In the new shaft a sulphide zone is exposed, and it is now proposed to continue this shaft to a depth of 200 feet. The general outlook of the property is satisfactory to these mining men, both of whom are equipped with a practical knowledge of the business, in addition to being classed as successful operators of the syndicate which they represent. Both visitors handled the drill with all the skill of miners, and their sampling was carefully and capably performed.
The Fairview, entering the class of a high grade property with its sulphide ores, is not unknown to that section of Peck district. Rich ore of such a character has frequently been encountered in mines of that field which adjoin the Fairview, running from \$250 to as high as \$1,000 to the ton, the Wildflower, War Eagle, Gladiator, Nelson, Lincoln and other nearby mines upholding the above valuation as occurring in the base state of the product. The Fairview's future it is but reasonable to expect, will show rapidly increasing values, as depth is given, and it is on this belief that deeper development will begin at the point where the new condition has been proven and big values are prevailing in the sulphides.

PROSPERITY IS ENJOYED BY PRESCOTT
MORE PEOPLE IN CITY THAN EVER BEFORE IS STATEMENT OF REAL ESTATE MAN.
(From Tuesday's Daily.)
That there are more people in Prescott this summer season than ever before in the history of the town is the assertion made by a prominent real estate man who has been here for over 40 years. A conservative estimate of the population of Prescott this summer is placed at 7,000 or more than 1,000 over the usual population.
This represents from 500 to 600 more summer vacationists than in preceding years. The result is that there are no houses to rent, no furnished rooms, and the hotels are filled every night.
Not only is the residential section filling up, but the store buildings are being occupied to such an extent that desirable locations for many kinds of mercantile businesses cannot be secured at any price.
Office buildings, too, are experiencing their share of prosperity. At least a dozen new offices have been opened in Prescott during the month.
It is altogether to the satisfaction of the pioneer realty man that this condition of prosperity prevails. It should mean the erection of more houses and more business blocks in the very near future to care for the increasing population and mercantile establishments.

ANOTHER NEW CAMP FOR MAYER FIELD

(From Friday's Daily.)
Kotli & Henderson have commenced delivery of machinery and supplies from Cordes siding on the Bradshaw Mountain road to the camp of the United Mining & Smelting Co. distant 21 miles, using auto trucks. The new mining movement is copper, formerly owned by E. J. White, and quite large operations are planned by the company formed a short time ago. Fifteen carloads of freight for the new smelter and mine are contracted for.

LAW QUESTIONS ARGUED BY ATTORNEYS

(From Sunday's Daily.)
In order to simplify the jury trials of the suits of Ball vs. White, and Turner vs. White which are to be heard soon in the Superior court, Attorney F. L. Haworth for the plaintiffs and Attorney LeRoy Anderson for the defendant, argued the questions of law which are involved in the cases before Judge Smith yesterday.
In Ball's suit, he asks for \$25,000 for injuries received in the accident which occurred during the wrecking of the old court house. He also asks \$500 to pay for the costs of the suit.
Turner, as the administrator of the estate of Lewis W. Schooler, deceased, asks \$20,000 and costs for the loss of the life of the deceased who was killed in the court house accident.

PUBLIC RECORDS

Instruments Filed as Recorded by The Prescott Title Co.

July 28, 1916.

Vernie Pague to E. A. Ordunez. Bill of sale.—Horses near Bill Williams mountain.

Nick Radakovich appropriates water of Granite Spring, Verde district.

Sheriff for Golden State M. & M. Co. to Theodore Katich. Certificate of sale, \$5,448. Golden State, San Francisco, Buck Horn, Gilbert, House and Bullion mine, Blue Tank district.

F. L. Haworth, et al., incorporate Oatman Hydro-Electric Power Co. Capital stock, \$5,000,000; principal office, Prescott.

July 29, 1916.

United States to Geo. W. Genung. Patent. N^o 9 of NE¹/₄ and SE¹/₄ of SE¹/₄ Sec. 17, NE¹/₄ of NE¹/₄ Sec. 20, 11N., 4W.

John B. Lecorr locates Omaha mine, Black Hills district.

July 31, 1916.

Alex. J. Diamond to George W. Hance. Forty-acre possessory right at head of Arnold canyon.

Alex. J. Diamond and wife to Geo. W. Hance. NW¹/₄ of SE¹/₄ Sec. 14, 13N., 3E., and water.

Alex. J. Diamond to George W. Hance. Cattle, horses on range near Equav Peak.

W. N. Hutton and F. H. Kester locate two mines, Copper Basin district.

Thos. W. Stockdale locates two mines, Castle Creek district.

Thos. W. Birks locates two mines, Black Hills district.

W. L. Zimmault and F. A. Mueller locate two mines, Black Rock district.

Wm. Blount and Bert Blount locate Big Buck mine, Walker district.

H. E. Crawford locates two mines, Hassayampa district.

A. A. Johns and T. J. Laird locate two mines, Hassayampa district.

N. H. Getchell locates a water right.

Al. Vroom locates Tom Boy mine, Copper Basin district.

August 1, 1916.

United States to T. F. Shea and U. V. Ex. Mg. Co. Patent.—Boquet Nos. 1, 2, 3, 5 and 6 mines, Verde district.
